SUMMARY

I design websites and apps from the side of the people who will use them: first it has to be clear and easy for them, then it can look good. 16 years of working with the public taught me to listen to what people really need. I research users, test ideas in Figma prototypes and build responsive, accessible sites.

SKILLS

- **UX & design:** Figma, Xtensio, wireframes, prototypes, user research, personas, user flows, usability testing, Google Analytics, SEO
- **Front-end:** HTML, CSS, JavaScript, jQuery, responsive design, Git & GitHub, GitHub Pages, WordPress, Elementor
- **Accessibility:** WCAG 2.2 AA, axe DevTools, Accessibility Insights · **Graphic design:** Photoshop, Illustrator · **AI:** Claude, ChatGPT

PROJECTS

CarMat Website — real client project in development · Claude (code in React + Vite), Git & GitHub, GitHub Pages

- Researched how customers order: every set is made for one car, so a standard shopping cart could not work
- Designed a five-step, photo-based order flow showing every production detail, from mat style to coverage
- Planned a local library of 66 car makes and 1,459 models, so the picker works with no external API
- Styled every screen and ran review rounds with the owner

Maker Space — accessible community workshop website · Figma, Claude, HTML, CSS, JavaScript, GitHub Pages

- Created a persona in Xtensio, a student who wants to 3D-print a project, to shape the structure and booking flow
- Built a responsive layout for mobile, tablet and desktop, with light and dark themes that pass contrast checks
- Audited to WCAG 2.2 AA (0 axe violations, manual check in Accessibility Insights); fixed tab order, focus and motion

SafeArea App — mobile UX case study · Figma, Xtensio, prototyping

- Ran a SWOT analysis, built two personas and mapped four task flows with error paths
- Tested the prototype with 5 participants (6 tasks each) and turned the findings into 4 design changes

Cooking Community — WordPress site · WordPress, Elementor

- Built a community site with recipes, events and a member idea form, set up so the owner runs it from the dashboard

Graphic design — Illustrator stickers, book covers and skateboard deck; Photoshop posters, magazine cover, ad and logo

EDUCATION

A.S., Web and Interactive Design, 2026 — Sierra College, Rocklin, CA

Master's Degree, Computer Science, 2009 — Academician Yurii Buhai International Scientific and Technical University, Ukraine (U.S. evaluated, 2025)

Certifications: Google Analytics, 2025 · HubSpot Inbound Marketing, 2025

EXPERIENCE

Secretary, Ukrainian Club — Sierra College, Rocklin, CA · Jan 2025 – May 2026

- Ran club meetings and gave presentations on the topics the club covered

Senior Specialist — Main Department of the Pension Fund of Ukraine in Volyn Region · Apr 2007 – Oct 2023

- Prepared analytical materials for management from the data of all departments
- Administered the department's WordPress website and social media pages
- Organized public events with local organizations and businesses, and worked with the media
